

Fugaproof

Stainproofing protection for joints

Use

FUGAPROOF is a waterproofing, water-based agent able to protect floor and cladding joints. It prevents the absorption of stains, particularly fatty substances such as oils and food fats, facilitating dirt removal. FUGAPROOF can be used to protect the permeable joints of any type of floor and wall covering without altering the physical appearance in anyway.

Instructions

Dilution: the product is not to be diluted
Application: The product should be applied directly to the joints using the special spout found on the lid of the product, then spread evenly with a small paintbrush. Leave to dry for a few hours after which the surface will be ready to walk on again. Any spillage of the product onto nearby tiles should be removed immediately using a paper towel. Alternatively, the product may be applied to the tiles with a paintbrush, after having poured a sufficient quantity into a suitable container.

Packaging

500ml bottle.
 Box containing 12 bottles.

Composition

Dispersion of organic resins in water.

Technical Characteristics

Appearance: transparent pinkish liquid
 Odour: alcohol
 Density: 0.997 kg/l
 pH: 8.6

Warning

Keep this product out of the reach of children.

Quantities

One litre will protect a 300m² surface area of 30x30cm tiles with joint widths of 0.5cm.
